Mini-PALMA (LR-S)
Size: 14" x 42"
100 YRD TARGET
10 SHOTS PER SCORING
BULL

Chuck Padulese already shot a perfect score of 300 on the 100yard version of this match. Now Chuck has a perfect score on the new 50yard version of the "Micro" version of this match. The scores after 4 matches at 50 yards are about the same as 100 yards. The targets are scaled to half size but to the shooter they will appear about the same or even slightly smaller in size. Chuck was using an Anschutz rifle with a 20power scope, crosshair with dot. The Mini-Palma smallbore match simulates the size of a target viewed at the 1000yard, 900yard and 800 yard distances. The 10 ring is 20 inches on the actual 1000 yard Long Range (LR) target and 0.8 inches on the 50 yard version. The difference has to do with the target's ring line width. The match consists of 30 shots for score and 20 sighting shots; from the prone position; with 45 minutes to shoot the match.

The high shooter with open sights was Joel Grupta with a 298-19X.

Bert Rogers-Outdoor Rifle
